

FISCHBACH

Luft- und Ventilatorentechnik GmbH **made in germany**

► Fresh air for all environments.

Fischbach axial fans always provides a fresh breeze.

Fischbach axial fans used when larger volume flows have to be promoted with lower pressure increases. In addition to the application for ventilation of buildings or as duct fan, axial fans are used for cooling (automotive, industry and smoke extract (garage ventilation, industrial exhaust air).

Long-life ball bearings, maintenance free (with long-life lubrication), impellers made of plastic, low sound level, cost saving, easy mounting in any desired position possible.

Convince yourself of Fischbach axial fans

- Compact design
- High-pressure cleaning possible
- Comprehensive safety functions
- Sensorless electronic assembly
- Extremely low vibration
- Variable installation sizes
- Low installation costs
- Fast amortization
