

Technical overview MEV-AP

1.1. General description :

- Medium and high-pressure centrifugal fan
- Impeller with forward curved blades
- Directly coupled motor
- Use : aspiration of extremely dusty air
- Max. air temperature : 80°C (150°C with cooling fan)
- Models : from MEV-APE 351 up to MEV-APG 901
- Available in execution 4

1.2. Performances (15°C, 760 mmHg, 1,22 kg/m³, 50Hz) :
